Annual Report 2025

A year in review

2025 was fraught with challenges: deepening geopolitical divides, escalating humanitarian crises, and widening inequalities that severely strained the multilateral system. For its part, UNFPA faced shifting global priorities, reduced funding, and increasing backlash against women's rights, gender equality and sexual and reproductive health.

Yet through it all, our teams upheld our mandate — advancing individual rights and choices while helping countries address population trends, inequality and resilience challenges — and delivered for women, girls and young people.

Last year alone, UNFPA's life-saving sexual and reproductive health services reached more than 40 million people. In crisis settings, UNFPA safely assisted half a million childbirths. We remained the world's largest provider of contraceptives and maternal health medicines to developing countries, preventing some 5 million sexually transmitted infections and tens of thousands of maternal deaths. Some 260,000 girls were saved from female genital mutilation. All of this was accomplished amid cuts to funding, particularly humanitarian funding.

How? Because we are never complacent. UNFPA prides itself on being efficient, adaptive and agile, and on learning from what works. Our growing partner base, diversified funding sources and digital innovations enabled us to sustain critical services, even amid disruptions in the wider multilateral system. A major driver of our results is the trust we build with governments.

We also scaled up partnerships with international financing institutions and worked with programme countries to grow significant domestic resource allocations for essential services, representing a powerful shift towards sustainability and national ownership. Finally, our most stalwart supporters and new donors trusted us to reach communities in need even — and especially — when others could not.

As a result, UNFPA closed out its 2022–2025 strategic plan having produced results of scale and impact. For example, global efforts to reduce child marriage, female genital mutilation and maternal mortality accelerated during this period, reflecting our unique combination of normative leadership, technical expertise and operational reach. Today, more women

and couples can decide freely whether and when to have children and more girls are in school, even if the pace of progress is not fast enough.

UNFPA has begun implementing its 2026–2029 strategic plan, which renews its focus on achieving universal access to sexual and reproductive health while also supporting countries with the data-driven demographic intelligence they need to prepare for population shifts — something our specialized mandate on population and development ensures we can deliver.

At UNFPA, we are unwavering in our commitment to stand with Member States to advance well-being across the life course; deliver transformative results; and build the resilience of individuals, communities and countries.

There is no inevitability to the fact that 700 women die each day from preventable causes related to pregnancy and childbirth. This is something we can and will change. That is why we are doubling down on proven solutions — including supporting midwives — underpinned by sustainable financing. In uncertain times, one thing is certain: UNFPA will remain steadfast — present in the most vulnerable settings, standing with those furthest behind, and standing for sexual and reproductive health and rights for all, everywhere — because everyone counts.

Delivering worldwide in 2025

Results from UNFPA's 2025 programmes

17 million
unintended pregnancies were prevented.*

38,000
maternal deaths were averted.*

5.2 million
unsafe abortions were prevented.*

118,000
HIV infections were prevented by the provision of female and male condoms.*

14,000
women and girls living with obstetric fistula received treatment.

5.1 million
sexually transmitted infections were prevented by the provision of female and male condoms.*

260,000
girls were saved from female genital mutilation.

41.7 million
women, adolescents and youth benefited from sexual and reproductive health services.

73.4 million
couple years of protection were provided by UNFPA-procured contraceptives.*

11.6 million
marginalized girls were reached with life-skills programmes.

* Global impact of contraceptives supplied by UNFPA.

Contraception provided by UNFPA worldwide in 2025

Male condoms	1,091,088,577
Female condoms	4,742,815
Doses injectable contraceptives	65,933,776
Oral contraceptives** (Monthly cycles of the pill)	58,623,462
Contraceptive implants	10,866,453
Intrauterine devices (IUDs)	2,372,351
Emergency contraceptives	3,522,965
Personal lubricants	140,236,816

** Oral contraceptives (monthly cycles of the pill) include both combined low-dose contraceptive pills (46,206,054) and progestogen-only pills (12,417,408).

Delivering worldwide, 2022 through 2025

Four years of results achieved under UNFPA's 2022-2025 Strategic Plan

66.1 million
unintended pregnancies were prevented.*

142,000
maternal deaths were averted.*

8.5 million
safe deliveries took place in crisis-affected countries.

Over 28 million girls
received life skills training/comprehensive sexuality education.***

23.6 million
new sexually transmitted infections (including 540,000 HV infections) were averted.*

Over 24 million women and young people
with disabilities received services supporting sexual and reproductive health and addressing gender-based violence.

820,000 girls
were saved from female genital mutilation.****

70 per cent
of the global population was counted in the 2020 census round.

* Global impact of contraceptives supplied by UNFPA.
*** Results from the UNFPA-UNICEF Global Programme to End Child Marriage.
**** Results from the UNFPA-UNICEF Joint Programme to Eliminate FGM.

Member States

United Nations Member States founded UNFPA and continue to guide its mission to achieve rights and choices for all. As our primary partners, Member States provide the vast majority of UNFPA's funding. In 2025, this included robust core resources — the vital, flexible funding that allows us to stay agile and reach the furthest behind first. Amid a shifting global aid landscape, this solidarity remains the bedrock of our ability to save lives and advance equality.

International organizations

As a UN agency, UNFPA collaborates closely with other UN funds and programmes to strengthen collective action and align mandates for coherent policy and programme delivery. Beyond traditional funding, UNFPA is deepening collaborations with international financial institutions, multilateral development banks, and global health initiatives to mobilize the financing needed to accelerate progress.

Civil society

Civil society is indispensable to realizing rights and choices. For UNFPA, civil society organizations are strategic partners, advocates and co-drivers of change. From policy dialogue to frontline service delivery in crisis-affected settings, they expand access, strengthen accountability and keep the ICPD agenda grounded in communities. UNFPA is deepening and scaling engagement with diverse civil society actors, especially women-led, youth-led and faith-based groups, to advance sexual and reproductive health and rights and ensure no one is left behind.

© UNFPA Paraguay/Mario Achucarro

Individuals

Individuals are increasingly important partners to UNFPA. In 2025, the Individual Giving Programme mobilized $9.7 million in contributions, with $7.2 million allocated to core funds. This represents a 36 per cent increase in core cash contributions compared with 2024.

© UNFPA Paraguay/Mario Achucarro

Corporate partners

Partnerships with businesses have resulted in innovative, scalable and sustainable solutions addressing UNFPA's mandate. Corporations such as Organon, Reckitt and Takeda Pharmaceuticals, among others, have consistently played a role in supporting global programmes over the years. UNFPA is also advocating to increase investments towards women's reproductive health in the workplace through the Coalition for Reproductive Justice in Business, benefiting up to 800,000 female employees globally.

© UNFPA/Mbuto Machili

Philanthropies/ foundations

Philanthropies and foundations are vital leaders in providing flexible, multi-year funding for UNFPA's development and humanitarian efforts. By modelling new interventions and generating evidence-based practices, these partners strengthen global advocacy for sexual and reproductive health and rights. Key contributors, including the Gates Foundation and the Children's Investment Fund Foundation, remain instrumental in driving UNFPA's mandate forward and scaling delivery of services on the ground.
