End preventable maternal deaths

End the unmet need for family planning

End gender-based violence and all harmful practices, including child marriage

UNIVERSAL ACCESS TO SEXUAL AND REPRODUCTIVE HEALTH AND REPRODUCTIVE RIGHTS

Integrated Results Framework Outcomes

Strategic Plan 2018-2021

Ensuring Reproductive Rights for All
OUTCOME 1
Every woman, adolescent and youth everywhere, especially those furthest behind, has utilized integrated sexual and reproductive health services and exercised reproductive rights, free of coercion, discrimination and violence.

1. Number of women who have utilized integrated sexual and reproductive health services
   - Number of adolescents who have utilized integrated sexual and reproductive health services
   - Number of youth who have utilized integrated sexual and reproductive health services
   - Number of disabled women, adolescent and youth who have utilized integrated sexual reproductive health services

2. Proportion of births attended by skilled health personnel

3. Coverage of essential health services

4. Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods

5. Contraceptive prevalence rate

6. Unmet need for family planning (percentage of women of reproductive age, even married or in a union, who have an unmet need for family planning)

7. Proportion of countries reporting no contraceptive stockouts in at least 60 per cent of service delivery points during the last three months
OUTCOME 2
Every adolescent and youth, in particular adolescent girls, is empowered to have access to sexual and reproductive health and reproductive rights, in all contexts.

1. Percentage of women 15-24 years old who correctly identify both ways of preventing the sexual transmission of HIV and reject major misconceptions about HIV transmission

Percentage of men 15-24 years old who correctly identify both ways of preventing the sexual transmission of HIV and reject major misconceptions about HIV transmission

2. Number of countries that engaged adolescents and youth, including marginalized adolescents and youth, in the formulation of national sexual and reproductive health policies

BULL’S EYE CONTINUES TO BE THE GOAL

POPULATION DYNAMICS

Achieve universal access to sexual and reproductive health, realize reproductive rights, and reduce maternal mortality to accelerate progress on the ICPD agenda

The Goal

Enable by…

To improve the lifes of…
1. Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care

2. Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by age and place of occurrence

3. Proportion of women and girls aged 15 years and older subjected to sexual violence by persons other than an intimate partner in the previous 12 months, by age and place of occurrence

4. Number of countries with laws and regulations that guarantee full and equal access to women and men aged 15 years and older to sexual and reproductive health care, information and education

5. Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

Focus on the “bull’s eye” – the goal of the UNFPA strategic plan

• Governments, non-organizations, civil society organizations, the private sector, tanks and other national institutions

• Country programmes, and global and regional interventions

• Country classification

• Middle-income countries, small island developing States, programmes and contexts

• Modes of engagement

• Country programme resource allocation system

OUTCOME 3
Gender equality, the empowerment of all women and girls, and reproductive rights are advanced in development and humanitarian settings
OUTCOME 4
Everyone, everywhere, is counted and accounted for, in the pursuit of sustainable development.

1. Proportion of countries that: (a) have conducted at least one population and housing census during the last 10 years
   Proportion of countries that: (b) have achieved 100 per cent birth registration
   Proportion of countries that: (b) have achieved 80 per cent death registration

2. Proportion of population expected to be counted as per 2020 census round schedule (2015-2024), that is actually counted Indicator presented to the 2017 second regular session edited to improve the measurement

3. Proportion of sustainable development indicators produced at the national level with full disaggregation when relevant to the target, in accordance with the Fundamental Principles of Official Statistics

4. Proportion of countries that have a national urban policy or regional development plan that responds to population dynamics

5. Proportion of children under 5 years of age whose births have been registered with the civil authority, by age

* The focus is on an enabling environment
** The focus is on an enabling environment and on institutional levels
*** The focus is on an enabling environment and on institutional and individual levels
Achieved universal access to sexual and reproductive health, realized reproductive rights, and reduced maternal mortality, to accelerate progress on the agenda of the International Conference on Population and Development and to improve the lives of women, adolescents and youth

- Protecting and promoting human rights
- Prioritizing “leaving no one behind” and “reaching the furthest behind first”
- Ensuring gender responsiveness
- Reducing risk and vulnerabilities and building resilience
- Strengthening cooperation and complementarity among development and humanitarian action and sustaining peace
- Improving accountability, transparency and efficiency

Theory of change handout: overall model change in brief
